Thanks. I will cite sources in detail and provide explanations once I get a chance to start writing. At this point I'm just analyzing data and creating figures and graphs.

FYI, I created two maps with isotope ranges (shallow, deep).

Great plots Dean! What program are you using?

Renee: here are the dual isotope plots for 1) downgradient and upgradient of fields; 2) downgradient of CAFO only; 3) downgradient of fields by depths; 4) downgradient of CAFO by depth. I ran out of time and couldn't add a legend with point concentrations, but you'll get the general idea of scale.

Providing the spreadsheet as well.

Thanks,

Dean

Hi All,

I made a new dual isotope plot that had point size indicate concentration. We should plan on skyping as well so we can share a screen. Dean, can you make a map of the site with NO₃_NO₂ concentration as the point size? Like those that you did for the isotopes.

Thanks and talk to you this afternoon.
Renée
